DETAILED ACTION

Oath/Declaration

1. The declaration filed on Jul. 22, 2004 is acceptable.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the features "said flip-up member freely rotates from an up terminal position to a down terminal position" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Art Unit: 2873

3. Claim 10 is objected to because of the following informalities: The phrase "the frame member spring" (claim 10, line 14) should read --a spring coupling hinge--. Otherwise, this phrase has no antecedent basis. Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-9 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: The limitations "said flip-up member freely rotates from an up terminal position to a down terminal position, said flip-up member being held in the down terminal position to said frame member by a magnetic force" are not disclosed in the prior art of record.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

The above objections to the drawings and to claim 10.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
